

TURF

Forged in silence. For the invincible.

ORIGIN

The design where it all begins.

Simple. Pure. Essential.

ORIGIN is the starting point of the invincible: a track that bears only the **SOLO** logo, accompanied by subtle side lines every meter. Nothing more, nothing less.

Its design reminds us that strength needs no adornment, only intent.

Each line marks progress. Each meter measures willpower.

Because the beginning requires no noise, only determination.

FORGE

Where effort takes shape.

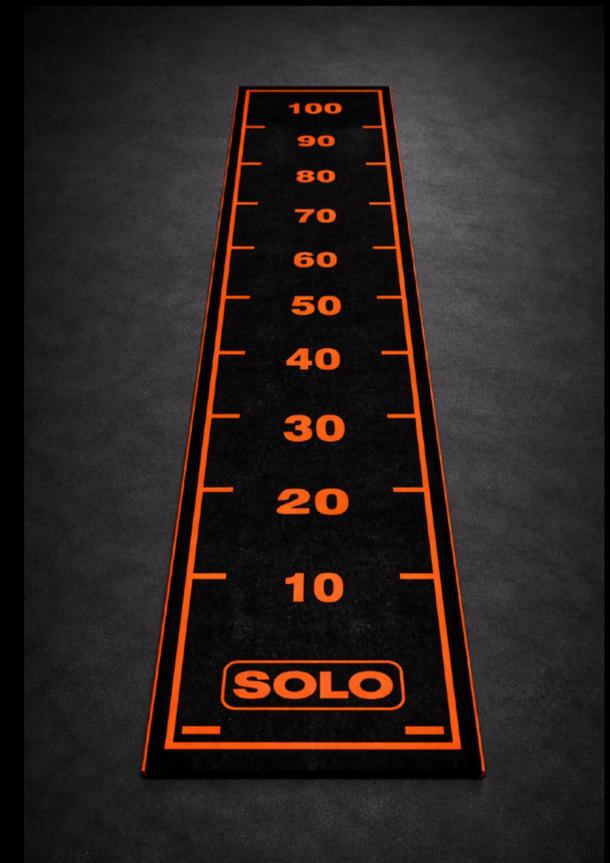

FORGE elevates the simplicity of Origin with a frame that encloses the battlefield.

Inside, the meter lines remain, steady reminders of progress.

The perimeter defines the space: the limit where the body bends but does not break.

It is a track that turns routine into ritual, sweat into symbol.

The place where consistency is forged in silence.

LEGACY

The ground of those who leave a mark.

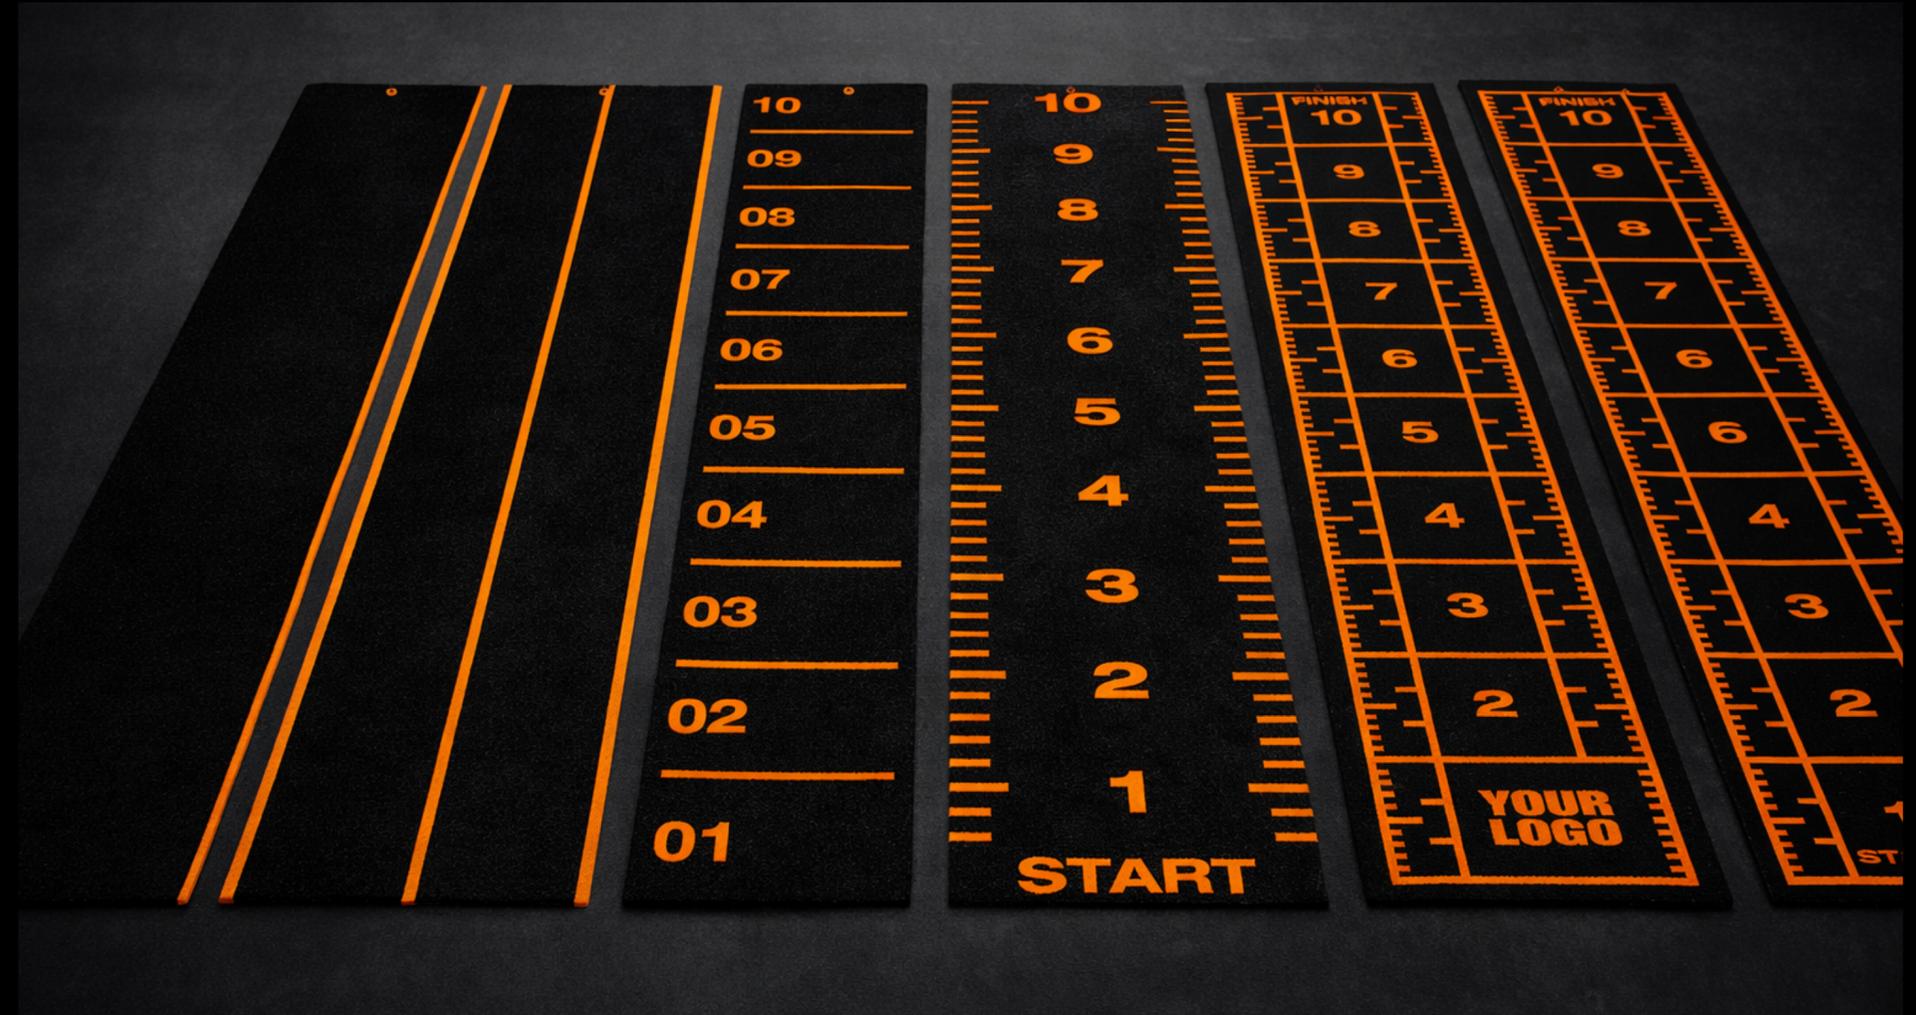

LEGACY takes the essence of Forge and carries it to its highest expression.

The frame surrounds the track, the lines mark every meter, and at the center rise the numbers: 10, 20, 30, 40, 50... clear, firm, heavy as the days one has earned.

It is not a design. It is a statement.

A track created for those who no longer count repetitions, but years of effort.

Because true legacy is measured in meters of perseverance.

SIGNATURE

Your ground. Your mark. Your story.

There are those who choose a track, and those who create one.

SIGNATURE is the materialization of that freedom: a track designed at the request of the invincible, adapted to their vision, their colors, their way of understanding effort.

Every stroke, every line, every logo bends to their will. It doesn't follow a pattern, it defines one. No two are alike, because no two paths have borne the same weight, nor have two stories risen from the same ground.

Signature doesn't belong to a collection; it belongs to a person.

Because some don't train on a track. They train on their own legend.

TURF

Where training stops being routine and becomes purpose.

SOLO TURF is the original ground, forged to bear the weight of the body, the iron, and the will. Every fiber has been engineered to resist friction, sweat, and the passage of time, offering a firm and stable surface for any type of functional training.

It makes no distinction between exercises, or between good days and bad, it always responds the same. It is the starting point for those who train in earnest, not for appearance, but for conviction.

Made to endure. Made to last. Made for those who never give up.

TURF PRO

The battlefield of those who push beyond.

SOLO TURF PRO is born from the same spirit as the original, but reinforced to withstand the impossible: drag, load, sled, and the fury of extreme training. Its tempered texture and superior density provide controlled friction that challenges limits without giving in.

It is the surface where power, speed, and character are measured. Every meter covered upon it is a declaration of strength and discipline.

Because effort leaves marks, but here, the ground honors them.

TURF TRANSIT

A steady step deserves respect too.

SOLO TURF TRANSIT is designed to accompany daily movement without losing the SOLO identity.

Ideal for walkways, equipment areas, or light training spaces, it preserves the sobriety and style of the original, with resistance adapted to continuous use.

It is the balance between functionality and presence: sober, elegant, and silent.

Where the body rests or prepares, the spirit still stands.
