

RITUAL

Forged in silence. For the invincible.

## DISCIPLINE 20mm

The calm before impact.

It is not a floor, it is a temple of control. Every step on **RITUAL DISCIPLINE** reminds us that strength is not born from impulse, but from mastery.

Designed for technical training, for precision of movement, and for the repetition that forges character, it offers a firm, balanced, and stable surface. It absorbs impact without yielding energy, keeping the body close to the ground and the mind in silence.

In its available colors (Black and Orange), shadow and fire coexist, the serenity of control and the spark of purpose.

**RITUAL DISCIPLINE** does not seek combat, but the perfection of gesture. Here, every movement is a prayer, every session an act of presence.

Because to train is not to move, it is to remain.

## IMPACT 40mm

The place where the body falls, and the spirit rises.

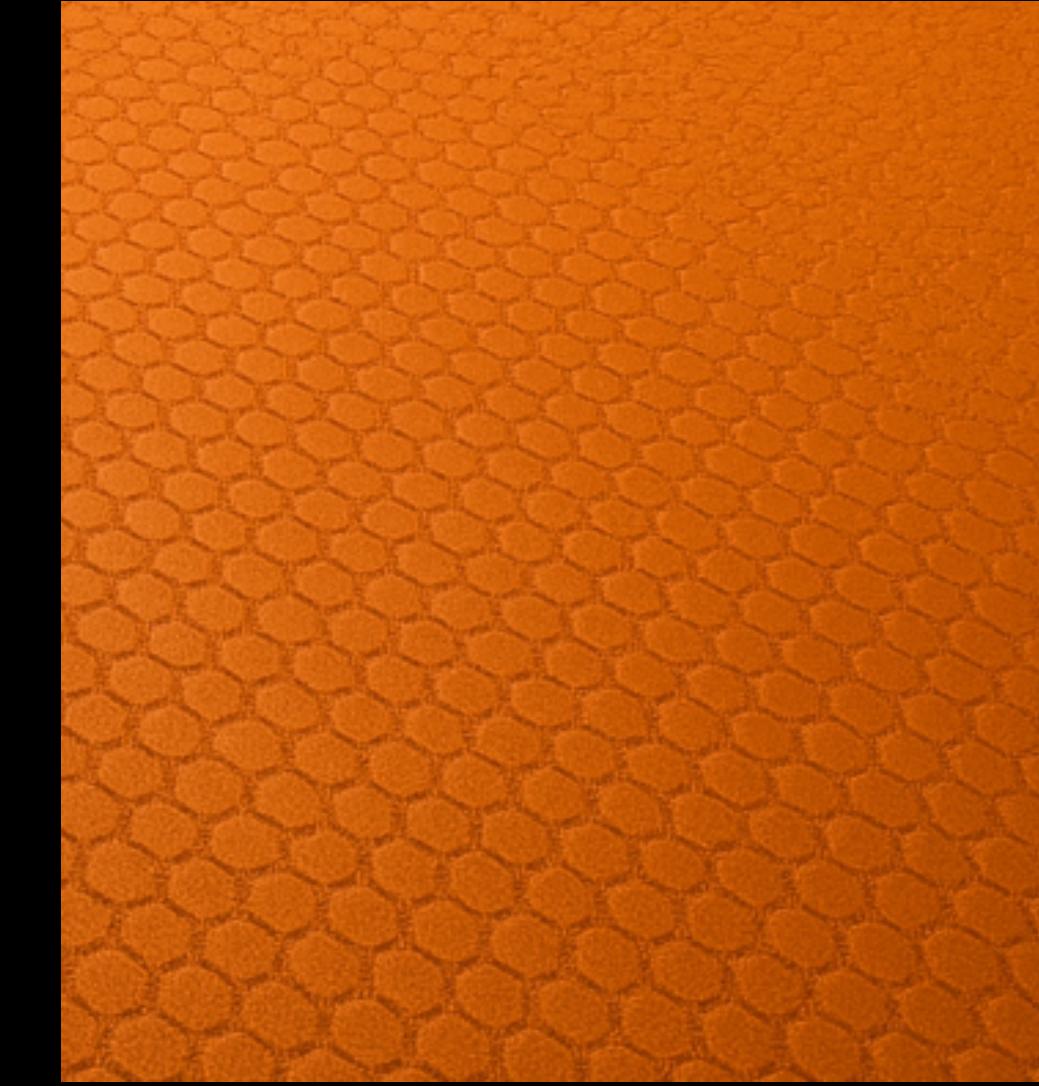

Made to withstand the extreme, **RITUAL IMPACT** is the ground of confrontation, of contact, of the silence that follows the strike.

Its 40 mm thickness absorbs the fall, protects the body, and restores the natural balance of movement.

Designed for martial arts, wrestling, and combat, it is the floor where every impact leaves a mark without causing harm, where noise transforms into purpose.

Black represents the stillness after combat; Orange, the energy that ignites it. Between them lies a sacred boundary, that of the body measuring itself.

It is not a tatami. It is the altar where effort becomes truth, where every fall teaches, and every victory begins anew, in silence.

## COLOURS | SIGNATURE

The essence of inner combat.

Some train upon a floor.  
Others turn it into an extension of themselves.

**RITUAL SIGNATURE** is the version that transcends convention, the tatami that allows the invincible to choose their own color, their own reflection. Absolute black, fire orange, or any tone that embodies their way of fighting.

It is not customization. It is a declaration.

Because the true battle is not fought against another, but against oneself.  
And when that moment comes, the ground too must speak the same language, that of silence, will, and identity.
